Our work

AES owns and operates more than 580 utility-scale and community solar, wind, energy storage and hybrid projects across 28 states in the US. We deliver cost-competitive clean energy to utilities, communities, corporations, and organizations to meet their clean energy and sustainability commitments both today and into the future.

AES' Waikoloa solar-plus-storage project, Hawai'i

Innovation

From technology to financing to operations, AES continually innovates in every aspect of the clean energy development process. This includes our 24/7 Carbon-Free Energy offering, which delivers clean energy to our customers even when the sun is not shining or the wind is not blowing. It also includes our patented DC-coupled Utility-Scale Renewable Peaker Plant solution, which delivers reliable, readily dispatchable carbon-free power from our large-scale solar-plus-storage systems during periods of peak demand.

Sustainability and community impact

AES is committed to being a good neighbor, developing greener, smarter solutions that improve lives and make a positive impact in the communities where we operate. Our people work closely with stakeholders to ensure the benefits of the clean energy transition accrue equitably, while respecting the values of local communities and cultures. Together, we create long-term value through social impact partnerships and programs aligned with the United Nations' Sustainable Development Goals and four social impact pillars:

- Access to energy
- Inclusive economic growth
- Environment
- Community resilience and relief services

Helping customers meet their clean energy objectives:

New renewable energy

We help customers develop and scale their renewable energy supply with solar, wind, energy storage, green hydrogen and hybrid solutions

24/7 carbon-free energy

We work with customers to develop a holistic energy strategy and implement a tailored portfolio to run on 24/7 carbon-free energy

Green blend

We incorporate renewable energy alongside conventional generation to ensure reliability, affordability, and sustainability for our customers

Bloomberg NEW ENERGY FINANCE

We are proud to be recognized by BloombergNEF for the past three years as one of the top two Sellers of Clean Energy to Corporations Through PPAs, reflecting our leadership in co-creating innovative energy solutions with our partners.

FTSE4Good

Recognized for our commitment to sustainability
