

RIVERSIDE SOLAR
Jefferson County, New York

NOTICE OF FILING OF APPLICATION

Riverside Solar, LLC is proposing to construct a major electric generating facility under Section 94-c of the Executive Law. This notice announces that on or about October 5, 2021, Riverside Solar will file an Application pursuant to 19 NYCRR §900 seeking a permit from the Office of Renewable Energy Siting (ORES) authorizing the construction and operation of the Facility. A Notice of Filing of Application was previously published on or about July 21, 2021, but the application filing was delayed. A Notice of Intent to File an Application was previously published in accordance with 19 NYCRR §900-1.3(d) on or about March 26, 2021.

The Riverside Solar Project is a 100 megawatt (MW) solar photovoltaic electric generating facility proposed to be located in the towns of Lyme and Brownville in Jefferson County, New York (the "Facility"). The Facility will span approximately 1,000 acres and plans to connect on National Grid's Lyme Tap off of the Thousand Island - Coffeen 115kv line. The Facility is anticipated to positively impact both the environment and the local economy by reducing carbon dioxide emissions by an estimated 133,000 metric tons each year – the equivalent of taking approximately 28,000 cars off the road – and producing significant tax revenue and other economic benefits for the area. The Facility will include solar panels, access roads, substation, inverters, transformers, electrical collection lines, gen-tie line, and temporary construction staging and storage areas.

For more information about the Facility please visit the Facility website at <https://www.aes.com/riverside-solar-project> or contact Riverside Solar at:
