

# Sylvan Solar

AES' Sylvan Solar is a proposed solar facility in Newaygo County, Michigan. We are committed to responsible clean energy development that creates longterm value and positive impact for both the environment and local communities.

The project will incorporate the most advanced solar energy technologies to support Michigan's goal of 100% carbon neutrality by 2050. Sylvan Solar is anticipated to begin construction in 2027, and operational in 2029.

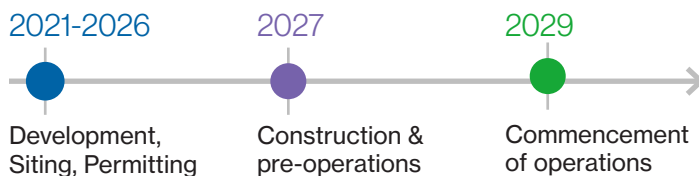

## Partnering with communities for the future of energy

At AES, we understand that our success as a company is only as strong as our partnerships with the communities where we operate. That's why we partner with stakeholders in local communities, including local contractors and non-profit organizations to understand how we can best work together to support sustainable social and economic development. We're committed to being a good neighbor, ensuring safe, responsible clean energy development that improves lives and builds stronger communities.

## Project overview

- 220 MW solar
- Enough renewable energy to power nearly 55,000 Michigan homes annually
- Over 1,000 jobs expected to be created during construction, and an estimated 10 long-term operations and maintenance jobs
- Approximately \$293 million expected net economic gains for southern Newaygo County over the life of the project

## Estimated project timeline:

## About AES

The AES Corporation (NYSE: AES) is a Fortune 500 global energy company accelerating the future of energy. Together with our many stakeholders, we're improving lives by delivering the greener, smarter energy solutions the world needs.
