Robbins Family and Farms Statement

Regarding The Greens Corners Solar Project

Our family has farmed in this community for generations, and we know that nothing we have built would be possible without the support of our neighbors. We are grateful for the community, our neighbors and our employees who are part of this community. Our families live and work in this community, and we too want what is best for it. Putting our community first isn't just a motto for us—it is the foundation of everything we do. Without the support of our neighbors, our agricultural businesses simply wouldn't exist.

We have heard the questions and concerns many of you have raised about the Greens Corners Solar project, and we want you to know that we take them seriously. Your voices have been heard.

We want you to know our role at this time. A portion of our land is part of the proposed project under an agreement with the project developer that we entered into in 2019. When we first explored leasing a portion of our farmland in 2019, we saw it as a responsible way to diversify our farm, and we continue to care deeply about how the project fits with our active agriculture and our community. While both the renewable and agricultural development landscapes have shifted since 2019, decisions about the project's design, permitting and timing remain with the developer and the state's permitting process. We understand this is frustrating and that you may have questions for us; however, based on the terms of the agreement, we are not allowed to discuss its details

As landowners, farmers and members of this community, we continue to share with AES our hope that any work on our land will respect active agriculture and protect the local landscape and ecosystem.

We encourage anyone with questions or concerns to share them with AES, who can be reached at Greenscornerssolar@aes.com or (866) 757-7697. We also encourage community members to attend AES's community information sessions.

We are grateful to our neighbors for their patience and understanding, and we remain committed to this community, our neighbors and our friends. We too love this community.

Thank you for your consideration,

The Robbins Family and Farms
