To: Lyme Town Board

Re: Limestone Solar update

AES is aware of the concerns about the impact of the project on the local alvar community. We are committed to avoiding all mapped alvar. We have conducted a rare plant survey and are working to minimize project impacts to the maximum extent practicable. Limestone Solar will not impact the Chaumont Barrens Preserve.

The project team is currently working on the next iteration of the project design and expects to submit the siting permit application to the office of renewable energy siting (ORES) early summer 2026

I would like to reiterate that there will be no battery storage at either Limestone Solar or Riverside Solar.

This April update has been shared with the town board and will be posted on the project webpage by 4/8/2026

If anyone has questions, comments, or feedback about Limestone Solar, you are welcome to contact the project team. We can be reached via email, phone, or the project webpage.
