Re: Limestone Solar and Riverside Solar

Limestone Solar Update

AES is aware of the concerns about the impact of the project on the local alvar community. As a result of these concerns, we have committed to avoiding all mapped alvar and are conducting an assessment of additional potential alvar onsite. We conducted a rare plant survey and are working to minimize project impacts to the maximum extent practicable. Limestone Solar will not impact the Chaumont Barrens Preserve.

The project team is currently working on the next iteration of the project design and expects to submit the siting permit application to the Office of Renewable Energy Siting (ORES) summer 2026.

Riverside Solar Project update

Project development is ongoing.

This May update has been shared with the Lyme Town Board and, due to webpage issues, was not accessible on the project webpage until Tuesday, May 26.

If anyone has questions, comments, or feedback about Limestone Solar or Riverside Solar, you are welcome to contact the project teams. We can be reached via email, phone, or the project webpages.
