Re: Cayuga Solar Project

Cayuga Solar Update

AES continues to advance development of the Cayuga Solar project located in the Town of Lansing, Tompkins County.

The project achieved a key permitting milestone on May 19, 2026, when the application was deemed complete by the Office of Renewable Energy Siting and Transmission (ORES).

The project team is actively progressing work to support participation in the 2026 NYSERDA solicitation. Internal review and refinement of bid materials are ongoing in advance of upcoming submission deadlines.

The Cayuga Solar project is expected to deliver renewable energy to the New York grid while supporting local economic development and research opportunities.

This update may be shared with the Town Board and posted to the project webpage. If anyone has questions, comments, or feedback about Cayuga Solar, the project team can be reached by email, phone, or through the project webpage.
