

Towns of Cortlandville, Homer and Solon – July Monthly Project Update

Project development activities for the Homer Solar Project are ongoing.

AES is currently working with an Engineering, Procurement, and Construction (EPC) firm to support and execute the construction phase of the project.

Construction activities are anticipated to begin with tree clearing in early 2027.

Construction is expected to be completed by mid-2028.

AES is working with the Town Attorney to review the Road Use Agreements and the Host Community Agreements, which will both be fully executed ahead of construction.

AES recently provided a \$2,000 renewable energy scholarship donation to both the Homer and McGraw Central School Districts. The scholarships were awarded to graduating seniors pursuing post-secondary education in a field related to renewable energy and will help offset costs associated with continuing their education. For additional information about the Homer Solar Project, please visit our project website at [Homer Solar | AES](#).

If you have any questions or comments regarding the Homer Solar Project, please contact us via email at homersolar@aes.com or through the AES hotline at 866-757-7697.
