Re: August Limestone Solar and Riverside Solar Projects

This update was shared by a Limestone Solar Representative at the Lyme town board meeting on Wednesday, August 12, 2026.

Limestone Solar Update

There have been no significant changes regarding Limestone Solar's development. I will be here after this meeting ends if anyone would like to speak with me in person to ask questions or share concerns.

The project team is currently working on the next iteration of the project design and expects to submit the siting permit application to the Office of Renewable Energy Siting (ORES) October 2026. Per Permit Application notification requirements, there will be a 60-day Notice of Intent to File a Permit Application that AES will:

- Mail to all residents and businesses within a 1-mile radius of the boundary of the project via USPS
- Post on the Project webpage
- Request the Town of Lyme post on their town webpage
- Mail/Email to state and local agencies and officials
- Place a notice in the local papers of record

Article VIII regulations also require a 3-day Notice of Intent to File an Application. The process and recipients for the 3-day Notice of Intent to File is the same as the 60-day notice.

AES anticipates mailing these notices late-August 2026.

Riverside Solar Project update

Project development activities for the Riverside Solar Project are ongoing, and there are no significant project updates to report other than that AES is currently working to identify an Engineering, Procurement, and Construction (EPC) firm to support and execute the construction phase of the project.

This August update will be posted on the Limestone and Riverside Solar webpages by Friday, August 12.

If anyone has questions, comments, or feedback about Limestone Solar or Riverside Solar, you are welcome to speak with me after the meeting and/or contact the project teams. We can be reached via email, phone, or project webpages.
